SELF-CLEANING PUMP VAULTS

Why *collect* solids, when you could *flush* them?

- Reduce maintenance time spent pulling and cleaning effluent pump filters.
- Patented self-cleaning design and active filter flush expels accumulated solids from the filter chamber each time the pump runs.
- Designed for easy installation and maintenance. Removable filter leaves pump and vault in place.
- Effluent filter includes integrated removable float tree. Change floats without pulling the filter.
- Multiple sizes available: 45", 54", and 78".
